Ongoing Health Care

Office Visits for Baby

Your new baby needs routine well care and immunizations to maximize health and prevent illness. We look forward to getting to know you and your new baby at these important visits and encourage you to keep a written list of questions to bring to discuss with your provider. Consistent with recommendations from the American Academy of Pediatrics, we recommend the following schedule for well baby care exams (*indicates routine immunizations):

2 weeks	4 months*	9 months	15 months*	2 years*
2 months*	6 months*	12 months*	18 months*	

Well care appointments may be made three months in advance, so we recommend making an appointment for your baby's next well care visit whenever you are in our office for a well care visit.

Our Nurse Advice Line

If you have any questions, please feel welcome to call our nurse advice line at 303-699-6200, option #2. Our nursing staff is trained to answer your questions or assist you with making a convenient appointment.

Central Prescription Refill Line

You may request a refill of a prescription for most medications online on our website or by calling our automated refill line during business hours at 720-870-0244. We are usually able to have a refill processed within 48 hours when calling during normal business hours.

Emergencies

In the event of a life-threatening emergency, always call 911. For other emergency situations you may call our office at 303-699-6200, option #9, for immediate assistance.

Insurance Information

It is extremely important that your baby be added to your insurance policy as soon as he or she is born, and that one of our physicians is chosen as the baby's primary care physician (PCP) if a PCP is required. We accept most commercial insurance plans.

Other Resources

APA Website

If you have access to the internet, please visit our website at *www.AdvancedPediatricAssociates.com*. We believe that you will find our website a very valuable resource. It contains comprehensive information regarding our providers, offices, and the wide variety of services we offer to our patients. In addition, it features an extensive data base of home care advice, over the counter medicine dosages, parenting tips and links to a large collection of important medical resources.
